PROJECTS

OneTable   Live • GitHub
– An OpenTable clone built with **Rails** & **React/Redux**
- Designed **Rails** backend auth system by hashing user password using **BCrypt** gem
- Structured **Redux** cycle to send **API** server requests while user browses through pages without refreshing
- Implemented **Google Maps API** to locate user's current location to find and visualize location of nearby restaurants
- Fully integrated and efficiently managed data storage structure using **PostgreSQL**

OnionUp   Live • GitHub
– Web service that pings and visualizes statistical graphs of onion services that are accessible through the Tor anonymity network
- Created backend logic to calculate response time and HTTP load time of each web servers
- Setup multi-threaded rails jobs to ping onion sites in the queue using **SideKiq** with **Redis**
- Used **D3** library to build live graphs by inserting data received from **API** request from **Redis**
- Fully developed frontend components with **Vue** and **Vuex** for state management
- Created total state management by implementing cooperative relationship with **ActiveRecord**

ClappyBird   Live • GitHub
– A pure **JavaScript** game that user controls a bird by clapping or key press, attempting to fly between columns of green pipes without hitting them.
- Structured the game logic only using **Vanilla JavaScript**
- Used **HTML5** Canvas for **DOM manipulation** and rendering
- Implemented **Web Audio API** for sound generation and processing
- Created graphic and interactive experiences using **p5.js**
- Engineered with **Webpack** to bundle and serve up the various scripts

EXPERIENCE

2017 – Present **Freelance Web Developer**
- Consult with clients for designing, coding and modifying websites, from layout to function and according to a client's specifications. Strive to create visually appealing sites that feature user-friendly design and clear navigation.

2014 – 2017 **Best America Service (Solution Consultant)**
- Business consulting firm providing business solutions to South Korean clients to create partnerships with companies in U.S. tech industry.

2013 – 2014 **Woods Bagot (IT Coordinator / Network Architech)**
- Maintaining and administering computer **networks** and related computing environments including systems software
- Provide technical support to IT requests from users for all PC hardware, software, and associated peripherals

TECH SKILLS

JavaScript

JQuery

React / Redux

Vue / Vuex

Webpack

Ruby on Rails

RSpec

HTML5

CSS3

PostgreSQL

Git

Heroku

AWS

LINUX / UNIX

IT - Network

OTHER SKILLS

Fluency in Korean

Networking

Communication

Critical Thinking

EDUCATION

App Academy, San Francisco
Jan 2018

San Francisco State University (B.A.),
Broadcast & Electronic Communication Arts,
Jun 2012
